1. Introduction

Purchasing a Schwarz Müller vehicle was a decision for a high-quality product.

The certification of your vehicle in accordance with DIN EN 12642 – Code XL makes annual inspections by

- Schwarz Müller servicing workshops
- Schwarz Müller authorised dealers
- any inspection association authorised to carry out and/or confirm the annual general inspection (e.g. § 57a in Austria)

a prerequisite.

Please note that the freight security logbook will only remain valid if:

1. the compulsory annual inspections are actually carried out;
2. all inspection items are checked as specified by the manufacturer;
3. the vehicle has not been modified without the manufacturer's written approval.

Always keep this logbook in the vehicle even when hiring out or selling it – it will help you show how well your vehicle has been maintained and is the record to present in case of traffic checks.

2. Inspection items

2.1 Preliminaries

Check the following before starting the inspection routine:

- Is the VIN on the cover and the inspection checklist on page 9/10 the same as that in the vehicle?

The section below describes the annual inspection items and components sorted by assemblies.

The equipment configurations were customised to meet the customer's preferences.

Actual component positions and images may differ according to the model type and configuration.

General notes on inspection:

- Check the weld seams for cracks
- Check whether screws and rivets are tight
- Check that all configuration options are in place and in good working order
- Check the tension belts, tarpaulin sheaves, tarpauling tensioning gears and door locks for proper operation and damages
- Check bonded parts for tight fit
- Check the operability of moving parts

Immediately have damages removed by a service centre authorised by Schwarz Müller. Only use spares approved by Schwarz Müller.

2 Front wall

Check that all rivets and screws are tight;
check the weld seams for cracks

Inner front wall: Check the weld seams and the reinforcement between
the front and side walls for cracks

2.3 Side wall

that the screws are tight

2.6 Load securing / lashing equipment

Please check the various designs of load securing and lashing equipment for damage and proper operability.
Also check that their mounting elements are tight.

Lateral lashing bracket next to the walking-floor

3. Annual inspection certificate

VIN:

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

Use this section to record the compulsory annual servicing measures carried out by the inspection association concerned.

The inspection certificates ensure continued road safety and reliability of operation and are the record to present in case of traffic checks.
